PROFILE

Seasoned front-end developer with thirteen plus years of extensive experience in designing and implementing user interfaces for various platforms. Proven ability to develop responsive and visually appealing web applications using cutting-edge technologies like React, Angular, and Vue.js. Strong background in collaborating with cross-functional teams to deliver high-quality projects on time. Passionate about creating seamless and engaging user experiences. Demonstrated leadership skills through leading teams in various projects, mentoring junior developers, and facilitating efficient workflows. Adept at conducting code reviews, setting development standards, and ensuring best practices are followed. Seeking to leverage my expertise and creativity to drive the development of innovative and user-centric digital solutions.

WORK EXPERIENCE

Diagio

APRIL 2024 AUGUST 2025

Real Time Data Dashboard

- This dashboard app for Diageo sales data features customizable dashboards, sales overviews, performance metrics, financial insights, and market analysis.
- It ensures data security with user authentication and encryption, and supports multiple languages and accessibility.
- The tool helps Diageo monitor financial activities, gain insights, and make data-driven decisions efficiently.

My Contribution

- As a React Redux developer on the Diageo sales dashboard project, my contributions included creating and implementing Microsoft PCF (PowerApps Component Framework) control components.
- Utilizing React, I developed these components to seamlessly integrate and perform optimally within the dashboard.
- Additionally, I leveraged Chart.js and D3.js to create dynamic and interactive data visualizations, enhancing the presentation of sales data and insights.
- I managed the publication process of these PCF components, ensuring their deployment and accessibility.
- My work on this project helped Diageo improve sales monitoring and decision-making processes.
- Manage ADO (Azure DevOps) for the project, creating and managing user stories, tasks, and sprints. I collaborated with the back-end team to ensure seamless integration of front-end components with the server-side logic.

WORK EXPERIENCE CONTINUE...

Guidewire

JULY 2020 TO MARCH 2024

US Based Insurance Company

- This insurance policy management system is a web application that allows users to manage insurance policies, claims, billings and customer information.
- It features a user-friendly interface, secure data storage, and real-time updates.
- The system helps insurance companies streamline policy management, improve customer service, and enhance data security.

My Contribution

- My contribution to this project as a React Redux developer included developing the front-end interface and user experience.
- I implemented React components and Redux state management to create a responsive and interactive user interface.
- I also integrated APIs to fetch and display policy data, claims information, and customer details.
- Additionally, manage ADO (Azure DevOps) for the project, creating and managing user stories, tasks, and sprints.
- I collaborated with the back-end team to ensure seamless integration of front-end components with the server-side logic.

Bluesky (Bluemine)

JULY 2020 TO MARCH 2024

US Based Key Competitors Insight tool

- This application is a kind of a tool to view the key competitors insights and generate the report as per the user's requirement.
- This tool is used by the IBM sales team to get the insights of the key competitors and their different segment report.

My Contribution

- My contribution to this project as a React Redux developer included developing the front-end interface and user experience.
- I implemented React components and Redux state management to create a responsive and interactive user interface.
- I also integrated APIs to fetch and display policy data, claims information, and customer details.
- Additionally, manage ADO (Azure DevOps) for the project, creating and managing user stories, tasks, and sprints.
- I collaborated with the back-end team to ensure seamless integration of front-end components with the server-side logic.

EDUCATION

BCA - Bachelor of Computer Application

from Dinabandhu Andrews Institute of Technology and Management, Kolkata, West Bengal University of Technology

2009

Class - XII with Science

from Mal Adarsha Bidya Bhavan School under West Bengal Higher Secondary Council (WBCHSE) in

2005
